Dear Recruiter,

I am a self-motivated and data-driven Mechanical Engineer with an extensive experience in 3D printing. I have been 3D designing and printing customized products since my second year of my bachelors, this experience made me develop customer-oriented skills that I believe will bring value to your company.

Throughout the course of my career, I have honed my abilities in 3D modeling and product innovation. I am an astute problem-solver capable of prioritizing and managing complex projects with proficiency.

In my previous role, I exercised skills in customer service, innovation and leadership and consistently contributed to team efforts and organizational improvements. I am open-minded and focused on new developments in my field. I have proven to be effective and motivational, with proficiency in leadership and collaborative work. I enjoy brainstorming and coordinating efforts to achieve a common goal.

This position would be the best fit for me because it is not going to be a job for me, but a passion. Since I learnt 3D modeling on NX9 I started designing 3D models for a hobby, then I got my first 3D printer and started my 3D printing business where I have 2 FDM and 1 SLA printers.

Please take a moment to review my enclosed resume. I would appreciate the opportunity to speak with you. I am looking forward to your response and thank you for your consideration.

Sincerely,
Martin Jaramillo
